# GET THE DIRT

Excellent People. Excellent Clients. Excellent Results.

APRIL 2024

## Kicking off the Season

It is hard to believe that spring is upon us and the landscaping season has begun. This will be a busy month in regard to setting the stage for the landscape season. Our teams will be onsite performing spring clean-ups, irrigation activations, pre-emergent applications, aerations, and the first round of fertilization. We look forward to an amazing season working with you and your team.

## Fun Facts

### Spring Bloom :

April marks the beginning of Spring in Colorado, bringing forth a burst of colorful blooms across the state, but be prepared to experience late season snowstorms. Landscapers need to be prepared for sudden shifts in weather and ensure that plants are protected from frost damage.

### Wildlife Awareness:

Colorado's diverse wildlife becomes active in April as they emerge from winter hibernation.

## Meet our newest addition

### Scythe Cuts

#### Stripes Like an Expert

Mows like a pro. Scythe follows contours, tackles slopes, and automatically adjusts cut patterns to keep the grass healthy and looking neat.

#### Lets Your Crew do More

Your team can spend their time keeping poperties looking their best while the robot handles the mowing.

#### A Perfect Cut, Every Time

Mowing speeds react to grass thickness instantly, preventing and clearing clogs without missing a blade of grass
