Excellent People. Excellent Clients. Excellent Results.

FEBRUARY 2024

Landscaping in February

February is an exciting month for the Green Industry world because we are gearing up for the `season by furthering our education and knowledge as season prep begins. Our team at LMI Colorado attended the ProGreen Expo which is the only green industry conference of its kind in the Rocky Mountain Region. At this conference over 4,000 green industry professionals have the opportunity to take education classes, network, and discuss the latest information for the upcoming season. We had the opprtunity to meet with our vendors and partners and discuss what's new and any challenges we may face over the next season. It was a great opportunity for our team and we are very excited to get out in the field and share all we learned with our clients and friends.

Roberto Nuanes, Business Development

Bids

The 2024 Season is just a few short weeks away... which is hard to believe but there are a few tips that might help get your bids back faster!

- * Include Property Maps
- * Share challenges from last season
- * Add a timeline
- * Outline the contract term
- * Contact us at 303-294-9000 or info@Coscapes.com

Fun Facts

- * The color pink is associated with feelings of love, warmth, and calmness. Having pink house plants in your home can contribute to a positive and comforting atmosphere. And it's the pefect gift!
- * Roberto, our Business Developer gifted all the office ladies a rose this Valentines Day!
- * Propogate today!
 - Water Propagation: pothos, spider plants, and philodendrons.
 - Soil Propagation: succulents, herbs, and many flowering plants.
