## LMI COLORADO

### Going Green

Introducing our electric lineup this season

### Irrigation Emergencies

Stolen backflow early Sunday morning. The team was on-site to assist in getting water off and mitigate water damage. We have teams ready to go when you are in need. Call 303-294-9000

Introducing Randy Morrow  
Business Development  
We are excited to welcome Randy to our LMI Colorado team. He will be working with the entire team on growth, expansion, and quality.  
Welcome aboard!

### Annual Flower Color

It is just about time to get that powerful punch of color with Annuals. We will be prepping beds, planters, and pots for annuals to be planted shortly after Mother's Day or weather permitting. If you are unfamiliar with annuals, they bloom quickly and showcase their amazing colors almost immediately because of that properties have boost of color quickly helping to showcase entrances, pools, and areas of importance.

### Colorado Adventures

#### Chase a few waterfalls

With all the fresh snow fueling the rivers and creeks around Colorado, Waterfalls will be near their peak flow at this time. The water will be too cold to plunge into, but mild May weather means you won't be tired and hot by the time you reach the falls. Be sure to pack some water shoes if you want to explore the riverbeds at the base.

here are a variety of choices for your waterfall adventure, some close to home. If you want to stay around the Denver/Colorado Springs area, check out Seven Falls or Helen Hunt Falls in Colorado Springs, or Rainbow Falls in Manitou Springs. Alternatively, head west to places like Rifle Falls State Park. Most of these will require a short hike to access, but the views are well worth it.

## After Hours 303-294-9000
