October 2024

LMI COLORADO

Fall Preparation

After the hottest September on record, Tuesday will be a cool break from the heat before record-breaking temperatures return. According to the National Weather Service; dry, sunny weather will continue into October. The daytime temperatures should start to cool down slowly. Some nights in October can get frost and many times October has had snow. In 2021 October the Denver Metro areas received a reported 15-25" of snow. With that being said we are starting to wrap up the season.

This month our crews shift to bi-weekly mowing. Our team will be focusing on prepping your landscape for the long winter months. Irrigation will be getting winterized. We also offer backflow removal and storage so contact your Account Manager for details. Safe storage as well as cleaning and prep for spring.

OCTOBER'S PROMOTION We are brining it BACK!

Need a rock refresh, new edging, retaining wall updated, or just want to refresh your existing landscaping? October is a great time to start. Through the month of October, LMI Colorado is running a promotion see below.
