

LMI COLORADO

# Get The Dirt

Excellent People. Excellent Clients. Excellent Results

## WILL YOU BE OUR VALEN-TREE?

Show your trees some *love* with LMI CO

We're excited to introduce our new **Arbor Care division**, offering expert solutions to protect and strengthen your trees year-round. We now offer Plant Health Care maintenance, insect and disease control, injection options, pine beetle control, Emerald Ash Borer protection, deep root fertilization and winter watering. Don't forget about our tree trimming, pruning, and tree removal. Give our team a chance this month.

### Why in February?

David Bell, our **Lead Arborist**, has been an integral part in helping launch our newest division. He believes that late winter and early spring are key times to invest in your property's trees. Read below:

*While trees can be pruned at any time of year, late winter and early spring is ideal because the absence of foliage allows for a clearer inspection of the tree's structure. This improved visibility helps identify potential hazards, remove damaged or dead*

*branches, and make informed pruning decisions. Pruning during dormancy also helps minimize storm damage by improving tree stability and overall form.*

**GOING GREEN  
BEFORE SPRING**

**PRO  
GreenEXPO**

This February, we'll be at ProGreen's Annual EXPO, sharpening skills, growing knowledge, and gearing up for the season ahead alongside 5,000+ green industry professionals.

**P.S. Have questions about our new  
Arbor Care division? Contact us today!**  
**Love, Team LMI CO**
